

# Oneida Soil and Water Conservation District

## Fact Sheet

**General Information:** The Oneida Soil and Water Conservation District was organized in 1941. They work with landowners to solve site-specific erosion problems. Oneida District counts on the skill of farmers and ranchers to help conserve their most precious resources, contributing to the District's financial, technical and educational support.

**Mission (or Function):**

- Make available technical, financial and educational resources.
- Develop county solutions to sustain, conserve and improve natural resources and promote sound management practices that protect the environment which are economically feasible and productive.

**FY 2014 Accomplishments:**

- In cooperation with the Soil and Water Conservation Commission and the Idaho DEQ, the "Wide Hollow Erosion Reduction" 319 project was completed.
- Supervised and conducted over 3000 inspections of the watercraft inspection station just South of Malad.
- The operation of the southeast Idaho's inspection and decontamination boat station was an intricate part of our district operations. Through an agreement with the State of Idaho Department of Agriculture. The Oneida SWCD supervised all the operations of the watercraft inspection station at the rest area south of Malad.

**Future Plans and Projects:**

- Wrights Creek Sediment reduction Project.
- Deep Creek-Rock Creek stream restoration (Curlew Valley HUC)
- Sage Grouse habitat improvement in Curlew Valley

**Wide Hollow Project**
