- ◆ Supported the Friends of the Aberdeen Gem Trail
- ◆ Supported the 5<sup>th</sup> grade science day with an owl pellet dissection station.
- ◆ Represented Division V at the NACD Regional meeting
- ◆ Maintained representation in the 3 Rivers RC&D, Big Desert Sage Grouse LWG and at the Springfield Park
- ◆ Sponsored 3 students to attend the Natural Resources Camp

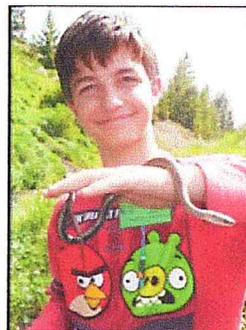

## District Supervisors and Staff

Chris Wride, Chairman  
Richard Line, Vice Chairman  
Sam Chandler, Treasurer  
Terry Lebrecht, Supervisor  
Lance Shackelford, Supervisor  
Amber Tilley, Administrative Assistant

## Ongoing and Future Projects

The South Bingham Soil Conservation District will continue to maintain and support a complete plant materials program through its partnership with the Aberdeen Plant Materials Center by maintaining facilities and equipment and supplementing summer labor expenses. The District would like to explore additional areas in which the Plant Materials Center and the District could expand their partnership to develop conservation materials. To accomplish this, the District will invite staff from the PMC to several Board meetings to discuss options.

In addition, the District will continue to expand its Public Outreach by continuing to support the 5<sup>th</sup> grade poster contest, FFA and educators wishing to explore conservation education opportunities. This District will offer scholarships, education and sponsorships to meet these goals.

Nathaniel was one of the campers the SBSCD sent to the Natural Resources Camp in 2014. He is displaying the snake he found in the creek there.

The District will continue to work with landowners and consultants along the Danielson Creek Watershed to improve habitat and water quality in Danielson Creek and Springfield Reservoir using available programs, resources and cost-share programs offered by partner agencies. The South Bingham SCD will continue to work with landowners to discuss their conservation goals to accomplish this task.

*Our Mission: To take the available technical, financial and education resources, whatever their source, and focus or coordinate them so that they meet the needs of the local land user for the conservation of soil, water and related resources.*
