

Caribou Soil Conservation District Fact Sheet

General Information: The Caribou Soil Conservation District was organized in 1951 to provide educational, technical and financial assistance to local landowners and operators, and conserve soil, water and related natural resources within the District’s boundaries.

Mission (or Function):

- Dedicated to promoting wise land and water use, providing information and education and giving assistance to anyone looking for ways of conserving and improving our natural resources.

FY 2015 Accomplishments:

- Completed 3 water quality projects –
- The 319 project on Bear River focused on an animal feeding operation, and installing solar panels and an off-stream watering system. The section on Whiskey Creek saw the removal of an old dairy facility and day lighting Whiskey Creek.
- The Trout Creek SRF project removed an old dairy and outbuildings, along with stream restoration.
- The Upper Blackfoot 319 project fenced off a portion of the Blackfoot and installed a solar pumping station.
- Working on a Pebble Creek 319 project – a ditch-to-pipeline conversion and diversion consolidation.
- Sponsored poster and speech contests.
- Held a project tour and rangeland tour.
- Sponsorships to Natural Resources camp and Idaho Envirothon.
- Annual tree sale program

Future Plans and Projects:

- Continue ongoing projects.
- Sponsor annual tree sales program.

- Host and sponsor multiple outreach and education programs throughout the county.

Bear River / Whiskey Creek 319 Project has fish running up the newly daylighted stream

Upper Blackfoot 319 - Solar pumping station
