Resources of Community

Concern Prioritized in FY2025

1. Fisheries (wild steelhead habitat)
2. Agricultural Lands (soil health)
3. Forestry (fuels management)
4. Threatened Ecosystems (Palouse Prairie)
5. District Capacity Building

In FY25, Latah SWCD implemented a fuels management program to reduce wildfire risk across the wildland-urban interface, with a focus on small-parcel developments and high-use public areas. These efforts will continue throughout Latah County to further improve community safety and landscape resilience.

LATAH SOIL AND WATER CONSERVATION DISTRICT

Latah SWCD partnered with private landowners to improve instream passage for wild steelhead and other aquatic organisms to reconnect upstream spawning and rearing habitat.

In FY25, several public and private entities worked with the Latah SWCD to undertake large meadow restoration projects to enhance wild steelhead habitat within the Potlatch River watershed.

FY 2025 Accomplishments

- Cumulatively, over 400 acres and 16 miles of stream have been enhanced with meadow restoration projects implemented throughout the Potlatch River basin.
- 29 acres of high-risk public and private forestland was treated to reduce wildfire danger and will now serve as a demonstration site for community education.
- Latah SWCD welcomed its new District Manager, Ryan Lawrence, who is working with planning staff and field crews to advance restoration projects across private, state and federal lands.
- Palouse Prairie restoration projects continue to expand on private lands throughout Latah County.
- Latah SWCD organized youth education programs and supported student participation in state-wide competitions and natural resource camps.

Board of Supervisors

Dave Huggins, Chairman
Kyle Hawley, Vice Chairman
Kirk Nelson, Treasurer
