**** Board Meetings: 2nd Wednesday of the month****

Mission Statement

Strive to develop County solutions to sustain, conserve, and improve our natural resources by promoting sound management practices that protect the environment and are economically feasible and productive.

Top 3 Priorities

1. Erosion/Soil Quality
2. Water Quality/Quantity
3. Plant Condition

No-Till Drill Rentals

This project has been successful in Oneida County. Two different no-till drills were purchased for landowners to rent for planting and to date there have been 4,020 acres planted with the drills. This project has assisted 43 different landowners who have used them.

Ag Education Day-Outreach

Through a collaboration with Oneida SWCD, the Oneida County U of I Extension and the Malad High School FFA club, they have successfully organized an elementary education day three years in a row. This event is held at the fairgrounds event center where just over 400 kids attend each year from Malad and Stone Elementary Schools.

The FFA students teach stations centered around natural resource themes. They are tasked with coming up with curriculum to cater to different age groups of K-5th grade children and teaching on the day of the event. This is all overseen by their FFA Advisor. The students both elementary and high school age look forward to this event each year.

Oneida Soil and Water Conservation District FY 2025

Watercraft Inspection Station

Oneida SWCD has successfully completed 15 years in Malad at the I-15 Cherry Creek Rest Area managing a watercraft inspection station for the Idaho State Department of Agriculture. The station is open March 1st thru November 30th.

- Number of Inspections: 12,529
- Number of Hot Washes: 737
- Number of Fouled Boats: 6

Daniels Off-Stream Watering System

This project worked to address livestock impacts on Dairy Creek. Through fencing and off-site water implementation, resource concerns were addressed such as erosion, and riparian vegetation.

WQPA Project-

This landowner has converted approximately 40 acres from flood to sprinkler. He installed a pivot irrigation system, along with a livestock watering system to reduce impacts in a sensitive riparian area around a spring and to provide adequate water for his livestock.

FY 2025 Revenue

State Funding.....$41,355

County.....$15,000

City.....$1,500

Total.....$57,855
